Offering a very high standard of short and long-term boarding since 1999:

- **Condos:** Guests are accommodated in spacious condos (*not cages*) with each room having a secure opening window, a shelf, lighting, a screen door allowing plenty of fresh air, and a stool to climb on.
- **Condo Size:** Standard condos are 3 by 5 feet long and are approximately 8 feet tall. There are 3 larger suites available (*they vary in size as they are corner suites*). The standard condos fit 1 or 2 kitties from the same home and the larger suites are for 2 to 3 kitties.
- **Modifications:** Condos can be modified to fit the needs of kitties with mobility issues. A staircase can replace the stool or the stool can be removed and the living quarters can be arranged on the floor only. Raised feeding dishes also available upon request.
- **Climate:** Indoor climate controlled with heating, air conditioning, and fresh air.
- **Feeding:** Guests are fed Canidae Cat and Kitten formula dry food, unless you provide another diet (*please specify on your Cat Information Form*). Feeding is twice a day, unless special schedules are required. Water is refilled or changed at each feeding. Kitties are welcome to eat a wet or a raw diet, but please bring their favorite kinds. We do have a refrigerator for storage.
- **Litter Boxes:** Litter boxes are cleaned and filled with a natural pellet litter twice daily at a minimum. If your kitty has special litter needs, you will need to provide those supplies.
- **Accommodations:** Clean and comfortable bedding, food/water dishes and litter boxes will be provided. Guests are welcome to bring their "favorite items" from home.
- **Brushing:** Daily brushing if your kitty is fond of it. Bring their favorite brush.

- **Attention:** Plenty of personal attention will be given to your loved one at least 2-3 times daily. We welcome you to bring toys and scratching posts for play and exercise.
- **Fleas:** Please make sure your kitty is free of fleas. We recommend using a topical treatment at least one week prior to boarding. If fleas are found on your kitty while boarded we will treat immediately with Advantage and you will be responsible for the charge (*see pricing below*).
- **Medications:** We can administer oral, eye, ear, and topical medications as well as subcutaneous fluids and injections. Refrigeration available (*see pricing below*).
- **Vaccines:** Current rabies (for indoor/outdoor kitties) and distemper vaccine required. Exceptions by veterinarian recommendation only.

Bring emergency contact information with you and let the contact know they are listed.
